

John Guest

Fittings, Valves & Tube

John Guest offers a wide range of push-fit connectors, tube and other fluid control products for drinks dispense and pure water applications. The world's first food quality push-fit fitting, the John Guest range is now over 800 items strong and provides the quickest and most effective of installations with the quality assurance you would expect. Pushing the tube into the fitting is all that is needed to produce an instant but permanent leakproof connection. The fittings are just as easy to disconnect and re-use without the need for replacement parts. Our Beverage and Drinks Dispense products are produced in FDA compliant materials making them especially suitable for potable liquids.

Part Number/Description

CI ACETAL IMPERIAL FITTINGS

The John Guest range of CI and CM fittings are manufactured in white (for inch sizes) and grey or black (for metric sizes) acetal. With a food grade EPDM 'O'ring they have been developed for the water industry but are equally suitable for other potable liquids. They are also recommended for intermittent hot water applications. The CI and CM range of fittings is NOT suitable for compressed air and vacuum applications. For these situations we recommend our [PI and PM range](#).

PI & PM ACETAL FITTINGS - IMPERIAL

Our PI and PM fittings are manufactured in grey (for inch sizes) and black (for metric sizes) acetal copolymer, making them especially suitable for applications involving foodstuffs and potable liquids. They are, however, equally suitable for air and inert gases and can be used on N2/CO2 (installed in accordance with The British Beer and Pub Association Code of Practice) mixed gas dispense lines and in pneumatics applications and vacuum.

POLYPROPYLENE IMPERIAL FITTINGS

The PP range of push-fit fittings is produced in white polypropylene and parts are fitted with EPDM seals. Polypropylene has the advantage of being more chemically resistant than acetal.

VALVES

John Guest acetal shut-off valves have a brand new full bore mechanism and are specially designed for the Brewing and Soft Drinks industries and for potable water. They are also suitable for air and inert gases such as N₂/CO₂. When used with N₂/CO₂, they can be used to a maximum temperature of 50°C and the valve should be installed in accordance with The British Beer and Pub Association Code of Practice. The range includes valves with short and long handles to operate a 1/4 turn on/off action. The valves are available with or without mounting clip.

1/2"	PISV0416S	

Tube OD	Shut-Off Valve - Short Handle	
3/8"	PISV0412CS	

Part Number/Description

The PP range of shut-off valves is produced in polypropylene and parts are fitted with EPDM seals. Polypropylene has the advantage of being more chemically resistant than acetal. The valves are for use with potable water. For use with other potable liquids please refer to our Customer Services Department for guidance. The valves are not to be used with compressed air, explosive gases, petroleum spirit and other fuels or for heating systems.

TUBE

The John Guest PE range of plastic tubing is produced in Linear Low Density Polyethylene for cold and intermittent hot water applications. Our tubing provides the benefits of a wide range of temperature and pressure suitability, broad chemical compatibility and is made from non contaminating materials. Common applications are in water purification, water conditioners, ice makers and misting systems. LLDPE is more robust than traditional low or medium density polyethylene and is recommended for use with cold and intermittent hot water. Our tubing is made from FDA compliant materials and is NSF International certified. John Guest Polyethylene tubing is designed for use with John Guest Super Speedfit push-in fittings, John Guest Shut-Off Valves and virtually all standard tubing connectors.
