

454 High Flow Brine Valve

454 HIGH FLOW BRINE VALVE — Today's larger commercial brine valves demand higher brine draw and refill rates. Building upon the original 454's design, the 454 High Flow has improved flow characteristics allowing brine draw up to 10 gallons per minute and refill rates up to four gallons per minute. A flow diffuser and heavier float prevent premature checking

Please specify lengths as listed below:

454-1 High Flow Brine Valve
(Pipe diameter 27mm)
