

## Carbon Block Filter

### Description:

Waterequip Carbon Block Filter construct of mineral carbon, simultaneously remove free chlorine and organic chemicals. The filter is shaped by extruding premium grade activated carbon with food grade additives continuously. The strong and rigid structure will leak no extractable during filtration operation.

Brother Filtration Carbon filters have high dirt holding. Smallest retention can reach Sum nominal. Carbon block filter cartridges provide you good taste and pure drinking water by removing sediment, chlorine, taste, odor and organic contaminants from water and aqueous solutions.

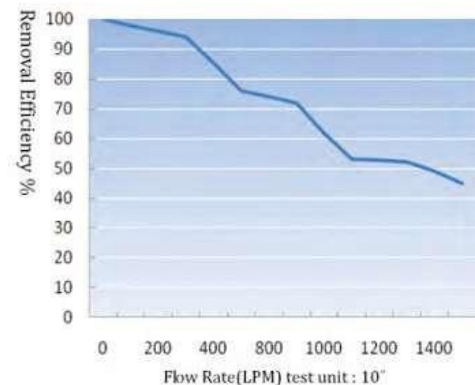

### Products Features:

- Nominal Filtration
- No Release of Carbon Fines Exceptionally Low Pressure Drop Industry Leading Performance at a competitive price
- Low pressure drop, high dirt holding and excellent contaminant reduction

### Technical Data:

Material Used and Color Options	
Carbon	QUALITY carbon
End Caps	Polypropylene
Inner/Outer Wraps	Polypropylene
Gaskets	EPDM
Temperature Rating	40 F to 180 F

Typical Organic Removal Value
