Who is Water Equip?

Water Equip is Australia's leading water treatment equipment wholesale company. We deliver world class dependable products accross Australia and the Pacific with a team of experts ready to help you.

Our wide range of equipment, technologies and know-how guarantees our clients the solution that keeps them ahead of the game. Our service is first class and we are a dedicated company delivering years of experience in the field, knowledge of products, and processes.

We offer solutions for all types of water treatment, no matter how big or small we have the answers. Water Equip is the leader in components, parts and consumables for all major water treatment manufacturers, sourcing

Why Water Equip?

Knowledge makes the difference!

- *We have more than 30 years experience in the water industry*
- *Our products and knowledge are diverse*
- *We have a solution for all types of applications*

One stop shop!

- *We are the leading stockist of filtration systems in Australia*
- *We represent more than 120 brands of products and equipment*
- *We are Australia's largest stockist of water treatment components*
 - *Sch 80 PVC Pipe and fittings*
 - *Specialist pipe products*
 - *Valves and valve assessories*
 - *Filtration system and components*
 - *Specialty filtration media*
 - *Reverse Osmosis systems and components*
- *We have access to complete water treatment solutions*

Technical support!

- *We have a team of experts that can help you choose the right equipment for the job. We can help with sizing, selecting and trouble shooting products for you.*

Accredited!

- *Water Equip is a certified ISO9001 quality assured company.*

Who do we serve?

- *Manufacturing Industry*
- *Commercial and Industrial water treatment companies*
- *Mining, Oil and Gas Industry*
- *Chemical and Petrochemical Industry*
- *Health Industry*
- *Pharmaceutical Industry*

Filter Housings

Cartridge Filter Housings

Water Equip filter housings are manufactured from the highest quality and constructed of reinforced polypropylene (PP), acrylonitrile butadiene styrene (ABS) and polycarbonate (PC). They are 100% food grade with EPDM O-rings' and are ideal for use in RO and filtration systems. They are commonly used in the industrial and commercial industry in fields such as irrigation, farm, food and medicine but more commonly used as a pre filter or under sink filter for residential purposes. The housings will take a multitude of cartridge filters such as poly spun sediment, carbon and carbon block, pleated and string wound cartridges.

CARTRIDGE FILTER HOUSINGS

PVC Cartridge Filters (3,5,8 or 9 Rounds)

Water Equip PVC cartridge filter housings are designed with high precision and are mainly used as pre-treatment filter in industries such as sewage water treatment, pre treatment to UF and RO machines, and as water purification equipment.

Features

- # uPVC material has excellent corrosion resistance
- # Working temperature 45° and 600kpa max working pressure
- # Inlet & Outlet are featured under the same line connecting with 1½" or 2"
- # The distribution system is from bottom to top
- # The system is designed with the top locator & closure system
- # Cartridges are easily installed

Stainless Steel Multi-Cartridge Filter Housings (Cluster Housings)

Water Equip offers high quality bag filter housings in both SS304 and SS316 for use in commercial and industrial water filtration and purification systems. A wide range of sizes and flow capacities available.

Features

- # Accepts SOE Flat Closed End, SOE Fin Closed End or Doe Style Filter Cartridges
- # V-Clamp/Eye Bolt Flange allows quick, easy cartridge change out
- # SS316 materials of construction for maximum corrosion resistance
- # Matt finishing (standard) Electropolishing is optional
- # Shell O-rings : EPDM (standard), Viton, Teflon encapsulated Viton optional
- # Maximum working pressure : 150PSI
- # Working temperature : 4-60°C

FILTER CARTRIDGES

Melt Blown Filter Cartridges

Water Equip's melt blown filter cartridges are self-bonded and structured with 3 different layers of fibre, thinner and tighter on the inside through to thicker on the outside. This unique design provides better dirt holding capacity and improved filtration, thus prolonging service life and lower operating costs.

Features

- # 100% Pure polypropylene construction
- # Wide chemical compatibility
- # No lubricator anti-static additives
- # Higher dirt holding capacity
- # Consistent filtration over the life of the cartridge
- # Low pressure drop & fits standard housings

Applications

- # Residential & commercial water treatment
- # Fine chemical, reagents, solvents, resins
- # Reverse osmosis pre-treatment
- # Food & beverage, pharmaceutical
- # Make-up water

Specifications

- # Outside diameter: 62mm, 63mm, 65mm, 115mm
- # Inner diameter: 28mm, 30mm
- # Micron rating (nominal): 1, 5, 10, 20, 30, 50, 70, 100 Micron
- # Filter Media: Polypropylene
- # Maximum Operating Temperature Rating: 52°C

String Wound Filters

Wound Filter Cartridges are also called String Wound Cartridges. Wound cartridges are most suitable for large dirt or sediment holding. Wound filters are made from dual layers of wound cotton and spun poly. The first layer catches the larger particle sizes and the inner poly spun core catches all the smaller particles up to its micron rating.

Features

- # Higher sediment loadings
- # Dual layer filtration

Specifications

- # Outside diameter: 115mm
- # Inner diameter: 28mm
- # Length: 10", 20"
- # Micron Rating (nominal): 1, 5, 10 Micron
- # Cotton String over poly spun inner core - suits standard and BB type filter housings
- # Maximum pressure: 40PSI

Activated Carbon Filter Cartridge

Water Equip's sintered/extruded carbon block filter cartridges (CTO) use high-density activated carbon and exclusive inert adhesives as the main materials of construction. The large granular surface area has a tremendous capacity to remove chlorine, unpleasant odours, colours, as well as spores and microorganisms. The unique manufacturing techniques and material of the highest quality guarantee excellent durability, minimal pressure loss and high filtration rate. CTO filter element is made of coconut shell GAC which as a better filtration effect upon chemicals.

Features

- # Reduce chlorine, bad taste, odours
- # No release of carbon fines
- # Low pressure drop activated

Specifications

- # Outside diameter: 70mm, 115mm
- # Inner diameter: 28mm
- # Length: 10", 20"
- # Micron Rating (nominal): 1, 5, 10 Micron
- # Filter media: Acid washed bituminous GAC & water washed coconut shell GAC, manufactured in a "block format" for maximum carbon volume - suits standard and BB type filter housings
- # Maximum pressure: 40PSI
- # End Cap: Polypropylene
- # Gasket: PVC

ACIC Series Filter Cartridge

The powdered activated carbon impregnated cellulose filter cartridges are the composite combine of the performance of depth filtration and adaption of activated carbon fine. The outside deep fibre media can remove particles and the activated carbon in each filter cloth can absorb smell, odour, sediment, pigment, VOC and organic chemicals. The inside fibre filter can prevent carbon particles and fine pollutants to pass, ensuring water quality.

Features

- # Nominal 10 particle removal rating
- # Absorption of organic substances by activated
- # Solution of photograph developing
- # Solution to remove oil & aromatic
- # Filtration & absorption finished in one time process

Application

- # Plating solution
- # Removing dissociative chlorine & volatile organic compounds (VOC) in solution
- # Drinking water & RO pure water treatment
- # Remove smell, odour, organic pigment
- # Remove organic chemical

Specifications

- # Outside Diameter: 58mm - 112mm

Pleated Filter Cartridge

Water Equip's Filter Cartridges are made of pleated polyester filter media for low pressure drop, increased surface area and longer life.

Features

- # Pleated design, increased surface area for contaminant removal
- # Longer filtration runs for fewer change-out & less maintenance
- # Low pressure Drop
- # Designed for general water filtration purposes
- # Long lengths have netting to hold pleats in place

Specifications

- # Outside Diameter: 4½"
- # Inside Diameter: 1-1/16"

Pleated Membrane Filter Cartridge

Water Equip's Polypropylene Pleated Filter Cartridge are a high pre-session construction using micro polypropylene media with a non woven net support. Adaptors are thermally welded within the cartridges making them stronger under extended running times.

Features

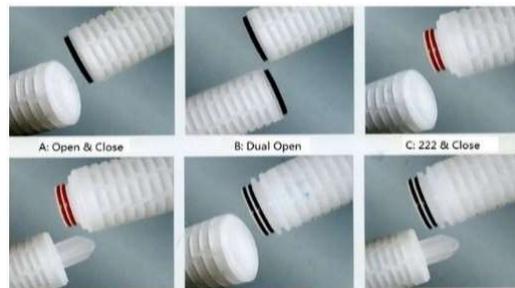

- # High surface area design provides superior flow rate & high dirt holding capacity
- # Low pressure drop & long service life
- # Using 100% virgin polypropylene media with extensive applications

Applications

- # Food, beverage, semiconductor, pharmaceutical
- # Solvents, acid, ink pre-filtration for RO & bottled water

Specifications

Oil Reduction Cartridge Filters

The ORC Oil Reduction Cartridge Filters remove large amounts of oils/hydrocarbons from water. They are made of a high quality activated carbon cellulose media designed to absorb dissolved/dispersed hydrocarbons based on high flow rates. The ORC filters are offered in 20" big blue and 40" standard diameter sizes to cover both large domestic and industrial applications .

Bag Filter Housings

PVC Bag Filter Housings

Water Equip offers a high precision, big flow, easy installation and easy maintenance bag filter system. It is widely used in pre and post filtration on sewage treatment systems, pre filters for UF and RO machines, foods, cosmetics, chemistry, medicine and textiles industries. The bag filter systems are available in 20m³/Hr (#1 Bag) and 40m³/Hr sizes (#2 Bag)

Features

- # uPVC material has excellent corrosion resistance
- # Unique seal system for less leaks
- # 2" Flanged connections
- # Fantastic appearance & compact inner construct
- # High precision so the filter range can be from 0.5-200um
- # High efficiency high flow filtration

Stainless Steel Bag Filter Housings

Water Equip offers high quality bag filter housings in both SS304 and SS316 for use in commercial and industrial water filtration as well as purification systems. With a wide range of sizes and flow capacities we can offer a number of options to satisfy your requirements.

Features

- # Side inlet piping connection
- # Unique 2-weld design
- # Buna N Seals as standard
- # Electro polishing stainless steel perforated basket
- # 2" GB, ANSI 150 or DIN flanged connections
- # Maximum operating pressure 150PSI

BAG FILTERS

Bag Filters

Filter bags are used in conjunction with bag filter housings to offer high flow rates and high surface area filtration. Water Equip offers a wide range of bag filter options.

Features

- # Higher dirt holding capacity
- # Polypropylene materials are FDA listed and accepted in the food process industry
- # 100% seam welded

#1 Size Bag Filter

1-2 Boxes Less 20%, 3 Boxes or More Less 30%

Automatic Valves

Runxin Valves

Specializing in the production of multi-functional flow control valves for water treatment, Runxin has experienced remarkable growth since its inception in 2000. Due to its consistent performance and strong applicability. Runxin is widely applied in filtering and softening systems, iron exchange equipment, boiler softening water systems and water desalination systems. Runxin enjoys an excellent reputation throughout the global water treatment Industry and offers an excellent cost effective option compared to others in the market.

Engineered to produce optimum performance and long service life, Autotrol valves offered by Water Equip are of the highest quality. Constructed with practicality in mind, Autotrol valves are able to be installed quickly and serviced efficiently meaning simple as well as reliable performing characteristics. The thermoplastic resin provides exceptional corrosion resistance and precision fit components. The Pentair brand offers up to date technologies and industry experience, thus providing the water treatment professional with a product they can trust.

Pressure Vessels

FRP Pressure Vessel Tank

Water Equip's range of high quality FRP water treatment vessels utilise PE or FRP liner and are suitable for residential, commercial and industrial softening and filtering systems. With perfect performance and corrosion resistance, the vessels can be sufficiently equipped with mechanical control valves to meet the expectations and requirements of our clients.

Features

- # Filament wound with epoxy resin
- # Full choice of pressure vessels available up to 73" Diameter with 94" height
- # Top & Bottom Openings available for 16" through to 63" Tanks
- # Maximum Operating Pressure: 150PSI
- # Maximum Operating Temperature: 49°C
- # 100% Corrosion resistant
- # Burst Pressure: 600PSI
- # Fatigue Cycle: 100,000 Times
- # Low Installation & maintenance

Pentair PRF-RO

The PRF-RO is a compact designed, high output reverse osmosis system with on-demand, continuous flow that does not require a storage tank and functions on line pressure without the use of pumps or electricity. This system features a consistent membrane efficiency with high recovery. The PRF-RO is made from high impact plastic construction with compact and sleek styling in mind.

PRF Operating Conditions:

Inlet Pressure: 40 - 80psi (2.76 - 5.52 bar)
 Inlet Temperature: 4°C - 38°C
 Inlet TDS: 50mg/L - 2000mg/L
 Inlet Hardness: 0mg/L - 171mg/L
 Flow Rate: 1.5LPM (2160Litres per day)

Inlet Chlorine: 0mg/L - 1.0mg/L
 Inlet Iron: 0mg/L - 0.1mg/L
 Inlet Manganese: 0mg/L - 0.05mg/L

Rejection: 92%

REVERSE OSMOSIS MEMBRANE HOUSINGS

Reverse Osmosis Membrane Housing

Water Equip stocks a huge range of parts and accessories for Reverse Osmosis systems including membrane housings and connections. Our housings are sourced from reputable manufacturers and are used through out the water treatment and filtration industry. Vessels are made from fiberglass or stainless steel and can be used in domestic, commercial and industrial applications. Sizes 4' and 8' available.

Ultra Violet Disinfection Systems

Ultraviolet is one of the most prevalent types of disinfection among water treatment systems and is employed in a number of different applications including industrial, commercial and municipal applications. Water Equip is proud to introduce a range of high quality advanced UV water disinfection systems for many water treatment applications. Manufactured by an industry leader with many years experience, we are focused on offering a comprehensive solution to all your UV requirements.

Steritron Max Ultra Violet Disinfection Systems

The Steritron Max is an All-in-One water treatment system for your house. There are several models for you to choose from that will ensure your home has the cleanest and safest water to drink. The Steritron Max is Australian made and is built tough for Australian conditions.

The Steritron Max is an All in One water treatment system that is sized for the small to average household of 2-12 persons to provide purified drinking water for domestic use. It is common to install the unit at the point of use and is ideal for treating municipal tap water, ground water, wells and river water for drinking (always check your raw water quality is suitable for drinking). The Steritron Max will purify water from most common contaminants such as sediment, while the carbon filter will remove colour taste and odours. The Carbon filter will also reduce chlorine levels and remove pesticides. The UV light disinfects your water killing harmful bacteria and viruses ensure safe

Waterequip Grey uPVC Pipes, Valves & Fittings

Un-plasticized Polyvinyl Chloride (uPVC) pipes and fittings exhibit excellent resistance to aggressive environments both naturally occurring and as a result of industrial activity. Grey uPVC is resistant to almost all types of corrosion, either chemical or electrochemical and has a number of other benefits including low flow head loss, light weight, easy installation, high strength, longevity, maintenance, chemical resistance and UV tolerance. With such a wide range of joining options that include solvent welding, threaded and mechanical connections, installations can be done efficiently and hassle free. Offering pipe, valves and fittings from 3/8" through to 8", including imperial and metric sizing as well as BSP and NPT threads, Waterequip has the ability to satisfy all your requirements.

uPVC Pipes and fittings are often used in the following applications:

- *Acid/alkaline chemicals piping systems*
- *Salt water piping systems*
- *Drinking water pipe distribution systems, both main and supply lines*
- *Irrigation water transportation systems*
- *Chemical waste pipe distribution systems*
- *Sewer and discharge pipe systems*

*Grey uPVC pipe supplied by Waterequip meets **ASTM D1785** for both Sch40 and Sch80. Grey uPVC Sch80 socket fittings meet **ASTM D2467** and grey uPVC threaded fittings meet **ASTM D2464**. Grey uPVC PN10/16 fittings meet **BS4346/1**.*

The working temperature range for Grey uPVC pipe systems is from 0°C to 60°C. Pressure ratings of pipe and fittings are generally nominated at a temperature of approximately 20°C to 23°C (73°F). They can be used at temperatures as high as 60°C, but it is important to know that as the temperature does increase, then the pressure must be reduced.

Principle Characteristics of Waterequip's "Effast Economy Ball Valve"

- * Ergonomic handle in shockproof ABS
- * Valve Body in uPVC
- * Double O'Rings in the stem command
- * Ball seats are supplied in PTFE
- * Pressure at nominal resistance - 16 bar at 20°C up to 2"
- 10 bar at 20°C for 3" & 4"
- * In closed position it is possible to dismantle the pipe downstream
- * Lined up passage which means the hole of the sphere corresponds to the inside diameter of the pipe

Principle Characteristics of Waterequip's " Effast Industrial Ball

- * Ergonomic handle in shockproof ABS
- * Valve Body in uPVC
- * Double O'Rings in the stem command
- * Complete interchangeability with other Effast valves including "Economy" Valve
- * Ball seats are supplied in PTFE
- * Gaskets are supplied in EPDM or FPM
- * Seats regulation and regulation of ball carrier are supplied in PTFE
- * In closed position it is possible to dismantle the pipe downstream
- * Easy to maintain with fast substitution of the O'Ring and of the gaskets of the sphere
- * Lined up passage which means the hole of the sphere corresponds to the inside diameter of the pipe
- * Blocking ball in position open/close with tap
- * "Industrial" can be actuated

Thread Sealant Paste

Christy's Ultra Seal™ is an all-purpose thread sealing compound, containing Teflon® for easier assembly/disassembly. Ultra Seal™ is a white, brushable, grit-free, smooth paste. Ultra Seal™ provides a leak-free seal on most types of metal and plastic threaded applications. It's non-toxic, non-seizing, and non-hardening. Ultra Seal™ does not transfer any taste or odor, is non-corrosive and contains an anti-galling compound that allows for easy disassembly after years of service.

Waterequip Flexible Dual Containment Systems

<i>Overview</i>	80
<i>WE-Hydrachem Dual Contained Hose - Flexible</i>	81
<i>WE-Clear PVC Dual Contained Hose - Flexible</i>	81
<i>Accessories</i>	81

Waterequip are pleased to announce our new partnership with Copely Developments, who offer a range of unique and quality solutions primarily for the water treatment market. It was Copely who initiated the first Flexible Dual Containment Hose giving double protection for utilities customers requiring increased environmental safety for the conveyance of water and chemicals, which has become the industry standard.

Hydrachem flexible, multi-layered reinforced heavy-duty hoses reduce the need and associated risks of multiple terminations inherent with rigid systems. Installation is easier and safer.

Solutions are offered for all water treatment applications including chemical dosing, filtration, membrane technology and aeration. Other markets that can benefit from our product range include: Water (potable, waste, industrial process), Chemical Processing, Pharmaceutical (production, manufacture, distribution), Mineral Processing plus manufacturing (production cooling lines, water distribution, effluent treatment).

Key Features

- WRAS approved construction – ideal for water treatment plants and sewage works.
- Hydrachem – LDPE lined – for resistance to differing chemicals used by the water industry.
- Easy to install – can be pulled off a reel through ducting in one continuous length.
- Good flow characteristics (mirror-smooth inner) with fewer terminations.
- Extremely durable, yet flexible.
- Abrasion resistant.
- Silicone and Cadmium-free.
- Extruded brilliant white finish to easily identify blemishes.
- Removes the need for catchment pots or alarm systems.
- Liner independently tested in accordance with BS 6920.

Sizes

- 6mm - 50mm ID in lengths up to 1000m

Colours

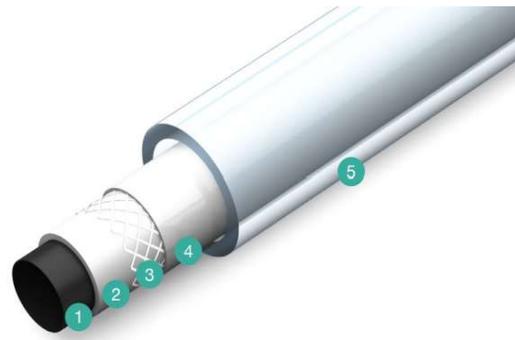

- Brilliant white with Black liner

Inner Hose

1. Low Density WRAS Approved Polyethylene
2. Ethylene Vinyl Acetate
3. Polyester Fiber Reinforcement
4. Ethylene Vinyl Acetate

Containment

5. Phthalate Free PVC

STAINLESS STEEL PRESS FIT TUBE & FITTINGS

Kembla Stainless tube is 316L grade (EN 1.4404) complying with DIN EN 10088, fabricated according to DIN EN 10312 and DVGW-W 541 and is supplied as straight 6m lengths with outside diameters in the range 15mm - 108mm. It is compliant with AS 5200.053 and has Watermark Approval #23151. Kembla Stainless tubes combine low carbon, at less than 0.03%, with a minimum molybdenum content of 2.3% for improved corrosion resistance. Low carbon, austenitic stainless steel is roll formed and then longitudinally plasma-inert gas-welded to precisely form the tubes. Kembla Stainless tubes are bright annealed and solution heat-treated, resulting in attractive, hygienic and highly durable product.

KemPress Stainless fittings are manufactured and quality controlled to AS3688, with 316L (material EN1.4404) for parts made from tube, 316Ti (material EN1.4571) for threaded fittings and 316 (material EN1.4408) for precision cast fittings, all having Watermark approval #23087 for Standard (EPDM) and Industry (FKM) fittings.

All KemPress fittings are optimally designed to ensure the most effective joint formation, achieving or exceeding the hydraulic and structural requirements of standards and are fully supported by the MM Kembla warranty of up to 25 years. KemPress Stainless fittings up to and including 54mm have a leading lip, whereas, the 76.1mm and 108mm press fittings do not.

KemPress Stainless press-fit fittings are available with three different O-rings depending on the application. Each type of O-ring is made of a different material, black coloured EPDM for Standard fittings, red coloured FKM for Industry fittings and yellow coloured HNBR for Gas fittings.

Standard press fittings utilise a black EPDM (Ehtylene Propylene Diene Monomer O-ring). EPDM possesses excellent resistance to ozone, sunlight and weathering, ahs very good flexibility at low temperature and good chemical resistance. This O-ring is suitable for hot and cold potable water applications and some industrial applications.

Industry press fittings utilise a FKM (Fluorocarbon) O-Ring. FKM has excellent resistance for high temperatures up to 200°C, ozone, weather, oxygen, mineral oil, fuels, hydraulic fluids, aromatics and many organic solvents and chemicals. It is ideal for petroleum products, fuels including those blended with ethanol or methanol, diesel, biodiesel, mineral oils and greases, silicone oils and greases, high vacuum, strong acids, ozone, weather and very high temperatures.

Gas press fittings utilise a HNBR (Hydrogenated Nitrile Butadiene Rubber) O-ring sealing element. HNBR possesses superior mechanical properties and improved resistance to heat, ozone and chemicals. HNBR has been used for decades in automative and

Waterequip Copper Press-Fit Tube & Fittings

Waterequip is proud to be a distributor of the MM Kembla, KemPress copper press-fit connection system. MM Kembla has combined the experience and knowledge of nearly 100 years of Australian copper tube manufacturing with German engineering to produce a press-fit connection system that offers all the benefits of copper with faster and easier installation. With a warranty of 25 years and a design life of over 50 years, KemPress offers you the peace of mind and the simplicity that you want. The KemPress tools are of the highest quality, are the lightest on the market and have the longest service life.

An extensive range of KemPress fittings are available for both Water and Gas Applications. Inside each fitting is a sealing element called an Elastomeric O-ring. A black O-ring indicates the fitting is for Water applications, and a yellow O-ring indicates the fitting is for Gas applications. They are not interchangeable for their different applications. It is essential that the O-rings are not contaminated or damaged by foreign material such as copper swarf or sharp metal. KemPress fittings have been designed to provide a tight fit when pushed together to allow the rough in to be completed prior to processing. This ensures you have the right design and tube placement and allows you to make adjustments, if required, prior to pressing.

The KemPress fittings are designed to deliver minimal deformation to the internal shape of the tube they are connecting to, reducing turbulence in the flow of the liquid. The connection provides a rigid coupling with excellent resistance to torsional forces. The objective of the press process is to deliver a permanent connection while achieving the required pull out strength according to AS3688. The KemPress process presses the lip of the fitting and then compresses the O-ring at the same time.
