

Revive Solar Water Softener Salt

product description

Revive Solar Water Softener Salt is a naturally evaporated washed solar salt with a very coarse grainsize typically averaging around 8mm. The product is washed and screened to remove impurities. The final product has a clear to opaque white crystal with no odour or discolouration.

chemical profile

Chemical	Specification	Typical Analysis
Sodium Chloride	Greater than 99.4%	99.5%
Calcium	Less than 600 mg/kg	500 mg/kg
Magnesium	Less than 500 mg/kg	200 mg/kg
Sulphate	Less than 3000 mg/kg	2000 mg/kg
Iron	Less than 10 mg/kg	< 2 mg/kg
Moisture	Less than 3.0 %	2.0 %
Insolubles	Less than 0.2 %	0.1 %

grainsize

- The product is of a coarse grain particle size, which has been screened above 7.0mm.

packaging

- The salt is sold in 15kg bags, 25kg bags and 1.2 tonne bulkers.
- The 15kg and 25kg bags are clearly marked with the distinctive Revive Solar label.
- Product is stacked 1.2 tonne to the pallet.
- All pallets are capped and stretch wrapped.
- Product supplied on Chep or AQIS pallets.
